Subject: Project status request

;

Hi Joel and Nancy,

Joel, I am wondering about the status of the Hilmar and Sunrise permit applications review and whether you foresee a need for my further support on those projects or any new projects in the near term.

Nancy, what is the status of the Florence Copper permit and Excelsior permit application? Do you foresee a request for my further support on those projects or any new projects in the near term?

My work load has been quite low for the last two or three months. For planning purposes, do you foresee that low level continuing indefinitely or will that soon change?

Thanks in advance for your feedback.

Best Regards,

Jim
